

What are
generics?

Find out
more here!

SANDOZ

Generics are equivalent to the original – with extra benefits!

Generics ...

... can be placed on the market as soon as the **patent protection** of the original product has expired.

... are as **effective** as the **original**, since they have the **same active substance**, the **same dosage** and the **same pharmaceutical form**.

... are tested, documented and manufactured according to the **same strict quality procedures** as the equivalent **original medications** and are therefore **just as safe**.

... are between **20% and 70% cheaper** than the equivalent original preparation.

... help to not only **lessen the load on your wallet**, but also the entire **healthcare system**, with **savings of over CHF 466 million per year**.

... contribute to **supply security** for patients.

... may be an **optimised composition** or **form** of the medicinal product.

And why generics from Sandoz?

Sandoz generics offer special benefits ...

... because **Sandoz** is an independant company with **Swiss roots**.

... because, with over **135 years of experience** in pharmaceutical manufacturing, we stand for **quality, innovation** and **tradition**.

... because we've been **antibiotic pioneers** for over 70 years.

... because we cover almost all **therapeutic areas** with one of the most **comprehensive product ranges** made of around **200 different active ingredients** in over **1,000 different dosages** and **pack sizes**.

... because our patients can **save** more in addition to the reduced price thanks to the low deductible of **10%**.

Ask about Sandoz generics at your pharmacy or doctor's office, where healthcare professionals will be happy to offer you valuable advice.

Same quality as the original, but at a lower price. Is that really possible with medications?

Yes, it is!
